

Lab CSS4

Due: 11:59 pm, Wednesday, September 27, 2017. Submit through Canvas.

Instructions:

- **No late submission** will be accepted.
- Your web page **MUST** run in any major browser without error.
- The submission should be one HTML file.
- Use CSS4 + dash + your full last name (with first letter capitalized and all other lower case) + capitalized first letter of your first name as the name of the HTML file. No space or other special character is allowed in the name. For instance, for me, the name of my webpage should be **CSS4-DingW.html**. **Violation of naming requirement will result in 3 points cut.**
- At the very beginning of the HTML file, using the HTML comment tag, i.e. `<!-- comments -->`, you should write your full name, the course number and course name (i.e. COP 3834C-01 Web Application Development), and the name of lab, e.g. CSS4. **Without this information, 5 point will be deducted.**

Subject

Write a complete webpage using HTML and CSS that

- 1) Contain four `<div>` elements. Name them div1 – div4. Their normal flow position is shown in the figure above.
- 2) Use CSS position property and associated top, bottom, left, right properties and implement following requirements.
 - Keep div1 at the top left corner of the browser window.
 - Make div2 always occupy the entire width of the browser window.
 - Keep div4 at the top left corner of div3, regardless the values of top, bottom, left, right properties of div3.
