Lab JS_Expression

Due: 11:59 pm, Monday, October 2, 2017. Submit through Canvas.

Instructions:
- **No late submission** will be accepted.
- Your web page MUST run without error.
- Use JS_Expression + Your Last Name + First Letter of Your First Name as your file name. Note that no space or special character other than underscore should be used in the name. For instance, for me, the name of my file should be JS_ExpressionDingW.zip. **Violation of naming requirement will result in 3 points cut**.
- In the HTML comment tags, at the very beginning of the HTML, you should put your full name, the course number and name (COP 3834C-01 Web Application Development), the name of lab, e.g. JS_Expression, and the date. **Without this**, **5 point will be cut**.

Subject

Write a complete webpage with JavaScript embedded at document level. The JavaScript code should demonstrate the usage of unary operators prefix ++, suffix ++, prefix --, and suffix --. The code should clearly show the delicate difference between prefix ++ and suffix ++, as well as the delicate difference between prefix -- and suffix --. For example, making two assignment statements that do exactly same operation with exactly same data except for one difference: one assignment uses prefix ++, the other uses postfix ++.
